

Future Goals—Hockey Scholar

Math Edition

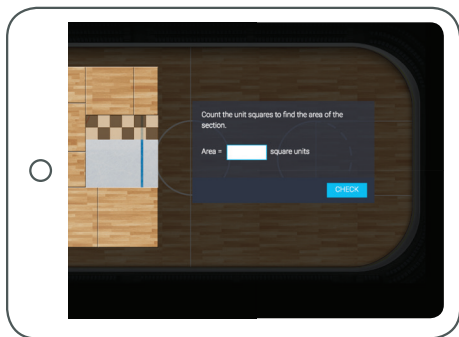

FUTURE GOALS™

POWERED BY EVERFI

Total Lessons: 6 lessons, approximately 25 minutes each

Subject Fit: Math, STEM

Standards Alignment: Common Core Math Standards, State Academic Standards

Future Goals - Hockey Scholar™: Math Edition uses the game of hockey to teach students about important, but difficult to teach Math concepts. From the pythagorean theorem to various area formulas, students apply their math skills to real world scenarios. In one lesson, students collect distance and time data to calculate a player's average speed. Each of the 6 lessons scaffolds students through problems of increasing complexity, giving tailored feedback along the way. The result is an experience that students both love and learn from.

Key components

Digital Lessons

Self-paced digital activities give students a safe and differentiated place to build new knowledge and skills.

Lesson Plans

Classroom-ready lessons provide educators with standards-aligned guides to integrate effortlessly into classroom instruction.

Reporting

See where your students are mastering concepts or where more support might be needed with a gradebook that updates as they move through the course.

Example Topics

- Measuring Angles
- Speed and Distance Formula
- Coordinate Planes

Course Flow

- Prediction
- Introductory Video
- Experiment
- Analysis
- Conclusion
